Universal D-Ring
Model DRNG-U-2

1. GENERAL DESCRIPTION

The Universal D-Ring (Figure 1) is a versatile accessory for cable management in rack-mounted equipment installations. The rugged metal D-Ring easily attaches to the mounting rail of a 1 RU rack space and provides mechanical support for cables.

Document Status

This is the initial release of this technical publication.

2. APPLICATIONS

The DRNG-U-2 Universal D-Ring may be mounted directly to a rack or on top of the mounting ears of existing equipment. Used primarily with the Enginuity Service Interface Panels, models SIP-1400 and SIP-3600, the DRNG-U-2 may also be used with the SIP-600, SIP-1200 and SIP-2400. The provided screws are longer than typical rack screws to allow for mounting on top of existing equipment. The DRNG-U-2 may be mounted to the left or right rack rail. It may also be wall mounted.

3. INSTALLATION

   a) Select the position of the D-Ring that is best suited for the application and align the mounting holes with the holes of the mounting rail as shown in Figure 2.
   b) Insert the supplied screws and fasten securely.
   c) Route cables through the angled slot following appropriate bend radius guidelines.

4. CUSTOMER SERVICE

If technical or customer assistance is required, please contact Enginuity at the following:
